

S20-1 Plus – Speed Limit Removal Guide

Follow the steps below to remove the speed limit on your S20-1 Plus e-bike. Please be aware that modifying speed settings may violate local laws.

Steps:

- 1 Press and hold the 'i' key and the '-' key together for 2 seconds.
- 2 Press the '-' and '+' keys to enter the password: 1212.
- 3 After completing the input, it will automatically jump to the d5p interface.
- 4 Briefly press the '+' key to adjust the parameter to dEF-Y.
- 5 Finally, press and hold the 'i' key to save the parameter settings and return to the normal interface.

Important: Removing the speed limit may increase wear on the bike and reduce battery efficiency.
